UNITED NATIONS GLOBAL COMPACT

A CALL TO ACTION FOR SUSTAINABLE BUSINESS
On 25 September 2015, the 17 Sustainable Development Goals of the 2030 Agenda for Sustainable Development were adopted by leaders of 193 countries at a historic UN Summit. Now, two years since their adoption, the private sector is stepping up efforts to deliver the Global Goals for People, Planet and Prosperity. Together, through the bold actions and collaboration between all sectors of society, we can end extreme poverty and hunger, fight inequalities and address climate change, ensuring that no one is left behind.
A Global Movement

Our mission is to mobilize a global movement of sustainable companies and stakeholders to create the world we want. Meanwhile, business leaders increasingly see that sustainable development is not just a moral imperative; it is their license to operate and innovate. We are unparalleled in our ability to unite companies with every stakeholder group working to advance sustainable development: Governments, civil society, labour, investors, educators and the United Nations.

WHO WE ARE

Launched in 2000, the United Nations Global Compact is a call to companies to align strategies and operations with ten universal principles on human rights, labour, environment and anti-corruption, and take actions that advance societal goals. Today, with more than 9,500 companies and 3,000 organizations, based in over 160 countries and more than 70 Local Networks, we are spreading the word far and wide that companies everywhere — of all sizes and from all sectors — can play a role in improving our world.

The UN Global Compact is a call to action for business to:

- Operate responsibly by embedding our Ten Principles deep into strategies and operations
- Take bold, innovative action to achieve UN initiatives such as the Sustainable Development Goals (SDGs) and Paris Agreement
- Advocate and inspire others to join the movement

The UN Global Compact supports business with:

- A unique, principle-based and normative platform, anchored in landmark United Nations Declarations and Conventions, for business to communicate progress and commitments
- Easy access to world-class expertise, tools and resources
- Global reach and multi-stakeholder connections, enabling business to help shape the sustainability agenda and be a force for good

To end extreme poverty, fight inequality and tackle climate change, we need your company to join our global movement. Across the world, companies committing to embed the Ten Principles of the UN Global Compact in their operations and report annually on their progress form part of the world’s largest network of responsible business leaders and practitioners and play a leading role in shaping the sustainability agenda.

Globally and on the ground through over 70 Local Networks, the UN Global Compact guides companies to do well by operating responsibly, taking bold actions, and bringing the voice of responsible business to dialogues with world leaders. Beginning in January 2018, we are strengthening and tailoring our support for business by introducing two distinct engagement tiers to suit your company’s needs: Participant or Signatory.
WHAT IS A PARTICIPANT?
Participants actively engage with the UN Global Compact at the global level, and at their national or regional level. Participants receive:
- Full access to global resources and activities.
- Full access to their country specific resources and activities.

Global Compact Local Networks

On the ground, companies face unique challenges to operating responsibly and have different opportunities to make a positive impact. Companies with operations and supply chains extending around the world need to view sustainability through a local lens and understand the conditions, challenges and opportunities of various locations. Global Compact Local Networks advance the Ten Principles and broader UN goals at the country level. They help companies understand what responsible business means within different national, cultural and language contexts and drive outreach, learning, policy dialogue, collective action and partnerships. Our Local Networks help companies make local connections with other businesses and stakeholders from civil society, Government and academia, and guide them as they put their sustainability commitments into action.
Making Global Goals Local Business

While the Sustainable Development Goals and the Paris Climate Agreement are universal accords, they will very much be addressed at the national level — where each country will apply their unique history, culture and capabilities.

As countries establish and enact national plans for achieving these Global Goals, Global Compact Local Networks worldwide provide the platform for business to engage with stakeholders from Government, the UN, civil society and communities to map a shared approach.

Our country networks played an important role in bringing the voice of thousands of responsible businesses to shape the Global Goals as they were developed, and now they are gearing up to give life and depth to the agenda.

Signatories and Participants are expected to pay their 2018 annual contribution by **31 March 2018**. Contributions will be used to deliver programmes and Participant services in collaboration with the Global Compact Local Network in your country of operation. Of all Signatory and Participant annual contributions, 5% will be used to endow a Local Network Development Fund, which will provide seed funding to new and early-stage Local Networks.

**Local Network participation** in the country where your company is headquartered is included in the required annual contribution for larger companies and all companies that choose the Participant engagement tier. **Local Network opportunities may differ between tiers. Please contact your Local Network for details** on info@globalcompactkenya.org. Find your Local Network at www.globalcompactkenya.org

**Subsidiaries** of active Signatories or Participants may continue to engage in the UN Global Compact under the umbrella of the parent company without paying a separate annual contribution. However, subsidiaries wishing to engage with a Local Network outside of the parent company’s country of operation may be asked to make a Local Network contribution. If the subsidiary wishes to engage in the UN Global Compact under its own name and capacity, with a separate listing on the website, they must engage fully as an active Signatory or Participant. In addition, they must pay the relevant required annual contribution. Read our **subsidiary policy**.

(The term “subsidiary” is defined as a company controlled by another company in the sense that the parent can dominate the decision-making process of the subsidiary in relation to its financial and operating policies in pursuance of the objectives of the parent company.)

Please note that all companies engaged as either Participants or Signatories are still required to submit an annual **Communication on Progress (COP)** in order to remain active in the UN Global Compact. The COP is a visible expression of a company’s commitment to sustainability, and stakeholders can view it on a company’s **profile page**. According to the COP policy, failure to issue a COP will change a Participant’s status to non-communicating, which can eventually lead to the expulsion of the Participant from the UN Global Compact initiative. Read our **COP Policy**.
